CATHETER TORQUEABILITY TEST

Interventional device test systems are designed to accurately record the performance features of medical devices including: catheters, guide wires, stent delivery systems, colonoscopes, endoscopes and scope tools. FUTEK's Rotary Torque Sensor – Hex Drive (TRH605) is fixed to the testing system to measure torqueability of a catheter penetrating a tortuous anatomy.

APPLICATION SUMMARY

FUTEK's Rotary Torque Sensor – Hex Drive (TRH605) paired with instrumentation USB Solutions and SENSIT Test and Measurement Software

All FUTEK application illustrations are strictly conceptual. Please contact us with questions.
